

Davies Creek camping update

Early in the year I asked NPRSR of any prospective changes to developments at Davies Creek and was told no, nothing planned. A few months later 2 new campsites have been opened. Campsites 7 and 8 have been established a couple of kilometres further along the road, just before you get into the rainforested area. Situated in tallish forest a little ways up from the creek I think this will be a nice place to wake up in the morning. It's also about half way between the Kahlpahlim Rock trailheads so it will be a good spot to overnight to commence and early morning mountain walk. Toilets are provided and there are some nice pools in the creek.
